
Murcia, Spain is a food basket of Europe. With the lowest rainfall in the continent, this region has through best-in-class research and development over hundreds of years – perhaps through necessity become a world class hub of Farms and Food production on the continent of Europe.

ATT (a wholly owned AIP BOESS brand) has curated an incredible business tour for the discerning executive who wishes to see the future of Agriculture and Food production and understand how to engage and insert new solutions into your project or ongoing concern.

Every delegate that has come on this tour, is now reassessing their Farming or Food production project.

If you want to achieve better profitability, join us!

5 days intensive touring
3 to 4 world class facilities per day
'Meet & Greet' day

Visits to;

-  Knowledge Hub – University degrees & workshops

 -  Farming Tractors and Sprayers
 -  Agricultural software and innovation
 -  Seedbeds and Nurseries
 -  Hydroponics
 -  Greenhouses
 -  Fish & Aqua Business
 -  Engineering & Turnkey Projects
 -  Funding solutions

Agri. Trade Tour to Murcia
20th November – 28th November 2021

<p align="center">KNOWLEDGE</p> <p>We will take you to visit the knowledge hub of this region and where much of the R&D that created world class companies have come from. This Agri Tech University now offers degree and post-graduate degree courses to Nigerians suited for our terrain and through this faculty, we are able to work with you to create a training program specific to your needs of any duration – one week to months.</p>	<p align="center">FARMS</p> <p>Necessity is the mother of all invention. Murcia has very minimal rainfall and it has forced this region to become so innovative that they are now a bread basket in Europe. We will take you to farms grown on rocky mountains – possible because of the ingenious method of farming using technology in water management and irrigation. If you currently have one harvest a year, could you have two?</p>
<p align="center">ANIMAL HUSBANDRY AND AQUA</p> <p>A very debated topic in Nigeria today. We will take you to facilities where they will demonstrate the whole value chain of animal husbandry from vets to machinery to medical, technology, product manufacturing including cheeses and milk and packaging all under one facility. Imagine in an aqua facility where the fish feed is produced in the same facility whilst growing vegetables at the same time. These projects are possible in Nigeria too, and are inexpensive. We will introduce you to the knowledge.</p>	<p align="center">BIO FERTILISATION AND PROTECTION</p> <p>You will visit the world leading company in research and biotechnology that has developed and commercialized unique bio-fertilizers for agricultural development and intensive production.</p> <p>For plant protection, we will also take you to an organic global leader of attractant diffusers, pheromones, repellents and traps for the mass trapping of pests that affect agricultural crops, forest areas, stored goods and environmental health.</p>
<p align="center">MACHINERY</p> <p>Murcia has become a world center for Agri. machinery. European standards. Cost effective. Machines equipped with exclusive technology, adaptable to YOUR needs, effective and efficient, which increases agricultural productivity through the use of electronic and computerized devices and which reduce the consumption of products (phytosanitary, fertilizers, manure...) and resources such as fuel, thus being more respectful of the environment and promoting sustainable agriculture.</p>	<p align="center">GREENHOUSES & HYDROPONICS</p> <p>Climate change is real and unstable weather is causing unpredictable harvests. Future farming is becoming more intentional and Greenhouses and hydroponics are an excellent method to safeguard your crops. We will take you to projects and facilities where the progresses achieved in the field of hydroponics are more and more important every time and currently farmers are working with ecological substratums that multiply water retention and the caliber of the fruits.</p>
<p align="center">ENGINEERING & TURNKEY SOLUTIONS</p> <p>Technology at the hands of the farmer. You will visit companies in Murcia and hear from professionals who advise and design projects of all sizes and now demanded all around the world. You will meet excellent professionals; able to design and put any kind of integrated installation to the test, as well as training professionals in-house for its maintenance</p>	<p align="center">FUNDING SOLUTIONS</p> <p>The biggest challenge for the agriprenuer today is funding. If you have an ongoing Agri or Food production business and you wish to expand your business through the acquisition of machinery from Europe, you will meet our funding partners and work with you to understand your business and not only advice on how best to expand, but will work to arrange the financing to do so.</p>

NEW!!! Do you trade Agri. commodities? Do you want to sell to Spain? We will bring buyers to our ‘Meet and Greet’ event to discuss export opportunities with you.

COMMENTS FROM OUR PREVIOUS DELEGATES:

“This tour is ten times better than a normal exhibition, because you get to spend hours with the manufacturer, understanding their solutions in full”

Mr. Taiwo Odutayo, MD – Thaworld Global Ltd

“The team at ATT (AIP BOESS) did an incredible job to organise such a detailed and life changing tour”

Mr. Ade Adekanola – Pearly Gates Trade & Farms Ltd

“I cannot wait to tell my friends about this experience when I get back to Nigeria....I am sure some of them will want to come so that we can join forces to do a project...I am now convinced that I should join with others in a co-operative instead of doing things myself. I even saw Tilapia fish facility which is exactly what I am thinking of”

Ms. Eriamah Uchenna Onyinye – Project Developer

**Agri. Trade Tour to Murcia
20th November – 28th November 2021**

We have flown scores of delegates to Murcia already and every one of them benefitted from the trade mission. Many of them are planning to return to the region on a curated visit within a few months and they are all reviewing their project plans as a result of their visit.
